

LEAKalarm

LA-WLDP

Water Leak Floor Probe

Features

- ▶ Highly responsive water leak detection probe
- ▶ Mechanically Robust
- ▶ Ideal for refrigeration drip trays and floor voids
- ▶ Height adjustable clip option

Description

LEAKalarm offers both linear and point detection solutions. Point detection is achieved by use of the LEAKalarm Floor Probe.

Probes are connected to LEAKalarm Detection Modules (maximum of two per module) which in turn are connected to the loop of the LEAKalarm water detection system control panel.

The two pins on the underside of the probe create a circuit when they come into contact with water, which activates a water leak alarm at the control panel.

Specification

Colour	Blue
Lead-in Cable	1m
Weight	120g
